SUMMARY

Senior Product Manager with 10+ years shipping growth, monetization, and creator-ecosystem products at scale across gaming and live-streaming. Track record of **+42% revenue**, **2.3× engagement**, and collapsing 200+ monthly ops hours to under 1 through data-driven product strategy. Alongside PM work, I design, implement, and independently deploy web services, connecting interaction design with state models and server integrations. Currently leading product strategy at NEXON KOREA while pursuing graduate studies in Data Science and Artificial Intelligence at Harvard University and an MBA at UIUC Gies.

PROFESSIONAL EXPERIENCE

NEXON KOREA | Seoul, South Korea **Dec 2025 – Present**
Senior Product Manager, Creator Partnership Team

- **Own** product strategy and roadmap for N-CONNECT, a structured creator reward and partnership program operating across SOOP, Chzzk, and YouTube — targeting 50+ salary-tier and up to 15 impact partners over a 5-season budget framework.
- **Designed** a three-axis Viewership Score system (Reach 40 / Quality 35 / Engagement 25) with shortform correction multipliers, establishing the first standardized cross-platform measurement for creator performance at Nexon.
- **Negotiated** a 2-year joint-business master agreement with SOOP (KRW 83M operational fee, barter/offset Drops model), coordinating legal, accounting, and platform stakeholders through 6 contract revisions to near-final execution.
- **Leading** engineering, marketing, and operations to launch the N-CONNECT preseason in April 2026 — driving cross-platform data collection and daily-active web engagement via real-time rankings, missions, and creator analytics.

SOOP Co., Ltd. (formerly AfreecaTV) | Seoul, South Korea **Feb 2016 – Nov 2025**
Product Manager, Livestream Ecosystem Lead

- **Owned** the mid-tier creator ecosystem end-to-end for Korea's largest livestream platform, directly managing **5,000+** creators across discovery, onboarding, retention, and monetization.
- **Shipped** a gamified creator mission platform reaching **82% participation** and **+42% monthly revenue** — now a core platform revenue line — through cohort-based A/B testing of reward loops.
- **Built** a personalized homepage recommendation algorithm using viewing history and intent signals, lifting homepage CTR **2.3×** and session engagement **+170%**.
- **Engineered** an internal ops automation platform (Python, GCP, Supabase, REST APIs) consolidating finance, creator support, and content review into one pipeline — reducing monthly manual ops **from 200 hours to under 1**.
- **Launched** a creator subscription service with iterated paywall UX and 4 tier structures, improving paid conversion **+31%**; cut partner funding approval from weeks to days with 100% partner coverage.
- **Led** creator programs at G-Star and equivalent large-scale events, increasing event participation **+60%**.

MMXXII | Seoul, South Korea **2022 – 2024**
Founder & Technical Lead

- **Founded** and led an early-stage digital studio shipping data-driven products from 0→1, owning discovery, prototyping, GTM, and vendor relationships.
- **Built** the core team, hiring process, and operational workflows; partnered with engineering contractors to deliver multiple consumer products end-to-end.

Paranoid Joy | Seoul, South Korea **2015 – 2016**
Product Manager

- **Ran** mobile growth and retention programs driving **+15% retention** and **–30% CAC** via A/B testing, lifecycle marketing, and push (Firebase, AppsFlyer).

highbrow | Seoul, South Korea **Oct 2014 – Mar 2015**
Product Manager

- **Secured** 5+ strategic publishing partnerships and led G-Star booth ops reaching 50,000+ attendees, tripling brand visibility through targeted event programming.

Ntreev Soft | Seoul, South Korea **Oct 2012 – Aug 2014**
Product Manager, Global Publishing

- **Led** localization and publishing across Thailand, US, and Japan; shipped 15 regionally-customized playbooks with a **98% QA** score across markets.

EDUCATION

Harvard University | Cambridge, MA **2024 – 2026**
Master of Liberal Arts (ALM), Data Science and Artificial Intelligence — in progress
Coursework: Machine Learning, Statistical Analysis, Data Engineering, Applied AI

University of Illinois Urbana-Champaign, Gies College of Business | Urbana, IL **2025 – 2026**
Master of Business Administration — in progress
Focus: Strategic Management, Innovation, Entrepreneurship for tech-driven markets

Massachusetts Institute of Technology (MITx) | Cambridge, MA **2021 – 2022**
MicroMasters — Statistics & Data Science (Python, R)

University of California, Irvine | Irvine, CA — Humanities coursework **2009**

SKILLS & CERTIFICATIONS

Product & Strategy: Product Strategy · Roadmapping · Live Ops · Growth · Monetization · Creator Economy · Recommendation Systems · A/B Testing · GTM · Cross-functional Leadership

Data & Technical: SQL · Python · R · Amplitude · Firebase · GCP · Supabase · Elasticsearch · REST APIs · Tableau · Node.js · React · PostgreSQL

Certifications: Google Data Analytics Professional Certificate (2023) · MITx MicroMasters — Statistics & Data Science (2022)

Languages: Korean (native) · English (professional)

INDEPENDENT APP PROJECT

Sidekick
App launch preparation · public sample demo · sidekickagent.app

A mobile app that turns content goals into recurring work for an AI team and reviewable results, for people without time to manage YouTube or blogs every day.

- A conversation about goals and topics leads into team setup, task execution, and result cards. Users answer follow-up questions and review outputs in chat.
- State flows track recurring work, interruptions, resumption, and approval requests. External actions such as publishing and sending connect to user review and approval.

Technology: React Native / Expo · JavaScript · Python / FastAPI · Supabase · PostgreSQL · Cloud Run · GKE / Hermes

Scope: The public website offers product information and a sample demo. App/backend implementation, public store release, and real channel integrations are separate milestones. Store availability and publishing or payment success with real accounts were not verified in this review.

INDEPENDENT WEB PROJECTS

Designed, implemented, and independently deployed. Scope verified 21 Oct 2026. These services are separate from the ONDO app.

Seoul Home Life Simulator (나도 서울 집좀 사자)

Public game · seoul-home-game.injoo.chatgpt.site

A life simulation that turns buying a home in Seoul into choices about income, housing, career, and family.

- To make housing and finance easier to explore, actual boundaries of all 25 districts become a 3D map with selectable apartments.

Technology: React · TypeScript · Three.js / R3F · D3 Geo · Sites / Workers · D1

Scope: The 2026-10-14 snapshot covers 407 officially registered large complexes; 319 match reported sales. Official data and game assumptions are separated. No live prices, transactions, or lending services.

Yeon, Sketch (연, 스케치)

Public experience · test payments · sketch.zpzg.co.kr

A visual survey turns hard-to-describe romantic preferences into a story told across three scenes.

- A 19-question flow adapts examples to previous choices. Faceless pencil-sketch cards make appearance preferences easier to select.

Technology: JavaScript · Node.js · Vercel Functions · Redis REST · Toss Payments · Playwright

Scope: Survey and story flow are available. The public site labels payments as tests with no actual charge. Per-order image generation depends on configuration; this does not establish live payment operation. Email delivery is unavailable.

Maju Tarot (마주 타로)

Card selection · integrations pending · tarot.zpzg.co.kr

A tarot experience in a hanok tea room, where a fictional guide and hands-on card selection help frame a question.

- One question per screen and restored answers preserve the context as users move into card selection.

Technology: Next.js · React · TypeScript · Zod · Workflow

Scope: Card selection and purchase information are available. Purchase and AI readings are disabled pending dedicated AI credentials and PG verification. No live human consultation; the guide and testimonials are created content.

Sinmyodang (신묘당)

Public free experience · lotto.zpzg.co.kr

Lottery-number entertainment combining produced photorealistic AI shaman videos with a short dialogue.

- Greeting and fan videos continue the same character and scene. Preloading and holding the last frame reduce blank transitions while handling browser audio restrictions.

Technology: JavaScript · HTML / CSS · Node.js · HTML5 Video · Playwright

Scope: Random-number entertainment without winning predictions. No live external AI responses or payment integration. Testimonials are fictional.

Some Heart Check (썸의 마음확인하기)

Public frontend prototype · some.zpzg.co.kr

A frontend prototype for entering relationship concerns and conversations, then exploring clues, wording, and next steps.

- Chat bubbles, typing indicators, and selection animations guide stepwise questions. KakaoTalk TXT, pasted chats, and screenshot previews share one intake flow.

Technology: JavaScript · HTML / CSS · Node.js · Playwright

Scope: Results are fixed samples, not analysis of submitted material. AI, OCR, email, and real payments are not connected. Inputs stay in browser memory and disappear on reload.
